Soggetti	Group identity - European Union countries Public opinion - European Union countries Transnationalism Sociology & Social History Social Sciences Social Conditions Europe Economic integration
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Transnationalism -- Linking transnationalism to citizen orientations towards European integration -- Being and feeling European : the effect of individual transnationalism on EU support and European identity -- The social stratification of individual transnationalism in Europe -- Transactionalist theory under further empirical scrutiny : purpose and scope of interactions -- The Janus face of increased transactions -- Transnational Europhiles, local Eurosceptics.
Sommario/riassunto	European integration has generated a wide array of economic, political, and social opportunities beyond the nation state. An early theorist of European integration, Karl Deutsch, expected this development to promote a collective identity and public support for European integration: by interacting across borders, Europeans would eventually acquire a common 'we feeling'. This book puts these expectations under scrutiny by developing a comprehensive theoretical model that helps us understand how transnational interactions relate to orientations towards European integration.
