Nota di contenuto	Primitive self-representation -- The metaphysics of conscious subjects -- The first person concept and its nonconceptual parent -- Explaining first person phenomena -- Descartes defended -- Paralogisms and first person illusions -- Perspectival self-consciousness -- Reflective self-consciousness -- Interpersonal self-consciousness -- Open conclusion : the place of metaphysics.
Sommario/riassunto	Christopher Peacocke presents a new theory of subjects of consciousness, together with a theory of the nature of first person representation. He identifies three sorts of self-consciousness - perspectival, reflective, and interpersonal - and argues that they are key to explaining features of our knowledge, social relations, and emotional lives.
