

1. Record Nr.	UNINA9910158597303321
Autore	Haun Paul L.
Titolo	Fast Facts : Diagnosing Cutaneous T-Cell Lymphoma / / Paul L. Haun MD MSc, assistant professor of dermatology and dermatopathology, University of Pennsylvania, Philadelphia, PA, USA, Julia J. Scarisbrick MBChB FRCP MD, consultant dermatologist, University Hospitals Birmingham, Birmingham, UK
Pubbl/distr/stampa	Abingdon : , : Health Press, , 2016
ISBN	1-910797-29-4
Descrizione fisica	1 online resource (96 pages) : color illustrations
Collana	Fast facts
Soggetti	Skin - Cancer Lymphomas T cells
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Cutaneous T-cell lymphoma (CTCL) is one of the 'great mimickers'. To be certain of the diagnosis, there must be clear correlation between the pathological and clinical findings, making collaboration between clinicians and pathologists essential. Knowing the patient's history, lesion description and diagnostic work-up will help the pathologist make a more informed decision with respect to the histopathology under the microscope. Likewise, understanding the terminology used in the pathology report will improve the clarity of the clinician's diagnosis. 'Fast Facts: Diagnosing Cutaneous T-Cell Lymphoma' is designed to help primary care providers, dermatologists and pathologists speak the same language. With over 100 superb clinical and pathological images, this concise, practical handbook will ensure clear communication with respect to the clinical presentation, histopathology and immunophenotyping of: <ul style="list-style-type: none"> <li>• early and advanced mycosis fungoides and its variants</li> <li>• Sézary syndrome</li> <li>• other non-mycosis fungoides CTCLs.</li> </ul> It is therefore essential reading for all pathologists, non-specialist clinicians and dermatology trainees.
