

1. Record Nr.	UNINA9910158735403321
Titolo	Vascular Diseases for the Non-Specialist : An Evidence-Based Guide // edited by Tulio Pinho Navarro, Alan Dardik, Daniela Junqueira, Ligia Cisneros
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XV, 279 p. 46 illus., 39 illus. in color.)
Disciplina	617.413
Soggetti	Vascular surgery Vascular Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	How to Make Decisions in Healthcare Practice? -- Anatomy of the Cardiovascular System -- Atherosclerosis -- Coagulation and Anticoagulant Therapy -- Peripheral Artery Disease -- Acute Limb Ischemia -- Cerebrovascular Disease -- Abdominal Aortic Aneurysm -- Peripheral and Visceral Aneurysms -- Thoracic, Thoracoabdomina, Iliac and Peripheral Aneurysms -- Risk Factors and Prophylaxis of Deep Vein Thrombosis -- Venous Thromboembolism: Diagnosis and Treatment -- Diabetic Foot -- Chronic Venous Disease and Varicose Veins -- Vascular Anomalies -- Aortic Dissection -- Ulcers of Lower Limb -- Lymphedema and Erysipelas -- Clinical Treatment Of Vascular Diseases -- Doppler and ABI -- Diagnostic Imaging Methods.
Sommario/riassunto	This book aims to provide non-specialist healthcare practitioners with current, focused and objective information on the most common vascular diseases encountered in daily clinical practice. In day-to-day clinical practice many healthcare practitioners do not have a working knowledge of the most common vascular diseases that frequently arise in patient care. Some of these topics include: aneurysms, peripheral arterial disease, diabetic foot, venous thromboembolism, cerebrovascular disease, aortic dissection, and acute limb ischemia. These commonly encountered vascular diseases are becoming public

health issues due to their high morbidity and mortality as well as increasing healthcare costs. Since patients with vascular diseases are often referred to non-specialists, the general practitioner must know how to properly handle the most common vascular diseases encountered in daily clinical practice. For each disease the concept, epidemiology, natural history, diagnosis and treatment are described, followed by essential advice on what the non-specialist can do for the patient and when to refer the patient to a specialist.
