Sommario/riassunto	Lifelines of Victory, authored by Squadron Leader Murray Harris, is an insightful exploration of the strategic aspects of World War II, focusing on the critical importance of supply lines and logistics in military operations. The book delves into various battlefronts, including the Libyan Campaign, Abyssinian Campaign, and the Russian Front, analyzing how transportation and supply chains influenced the outcomes of these conflicts. Harris discusses the role of transport officers and the strategic advantage gained through efficient use of fuel

lines, sea routes, and land transport. The work emphasizes the complexity of modern warfare and the necessity of maintaining secure lifelines to ensure successful military action. Intended for military historians and strategic studies enthusiasts, the book provides a detailed examination of the logistical challenges faced by the Allied and Axis powers, highlighting the pivotal role of transportation in achieving victory.
