Simulating Global Mobility at Shenzhen "International" Airport -- Conclusion: Learning from Shenzhen -- A Shenzhen Glossary -- Contributors -- Acknowledgments -- Index
Sommario/riassunto	This multidisciplinary volume, the first of its kind, presents an account

of China's contemporary transformation via one of its most important yet overlooked cities: Shenzhen, located just north of Hong Kong. In recent decades, Shenzhen has transformed from an experimental site for economic reform into a dominant city at the crossroads of the global economy. The first of China's special economic zones, Shenzhen is today a UNESCO City of Design and the hub of China's emerging technology industries. Bringing China studies into dialogue with urban studies, the contributors explore how the post-Mao Chinese appropriation of capitalist logic led to a dramatic remodeling of the Chinese city and collective life in China today. These essays show how urban villages and informal institutions enabled social transformation through cases of public health, labor, architecture, gender, politics, education, and more. Offering scholars and general readers alike an unprecedented look at one of the world's most dynamic metropolises, this collective history uses the urban case study to explore critical problems and possibilities relevant for modern-day China and beyond.
