

1. Record Nr.	UNINA9910159459703321
Autore	McElroy Kathryn
Titolo	Prototyping for designers : designing the best digital and physical products // Kathryn McElroy
Pubbl/distr/stampa	Beijing, : O'Reilly, 2017
ISBN	1-4919-5403-5 1-4919-5407-8 1-4919-5408-6
Edizione	[1st ed.]
Descrizione fisica	1 online resource (xxii, 300 p.) : ill
Disciplina	607.2
Soggetti	New products Inventions User interfaces (Computer systems) Human-computer interaction Application software - Development User-centered system design Rapid prototyping
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	1. What is a prototype? -- 2. Why we prototype -- 3. Fidelity for prototypes -- 4. The process of prototyping -- 5. Prototyping for digital products -- 6. Prototyping for physical products -- 7. Testing prototypes with users -- 8. Pulling it all together - SXSW tasting experience -- 9. What we have learned.
Sommario/riassunto	Prototyping and user testing is the best way to create successful products, but many designers skip this important step and use gut instinct instead. By explaining the goals and methodologies behind prototyping - and demonstrating how to prototype for both physical and digital products - this practical guide helps beginning and intermediate designers become more comfortable with creating and testing prototypes early and often in the process. Author Kathryn McElroy explains various prototyping methods, from fast and dirty to high fidelity and refined, and reveals ways to test your prototypes with users. You'll gain valuable insights for improving your product, whether

it's a smartphone app or a new electronic gadget. Learn similarities and differences between prototyping for physical and digital products; Know what fidelity level is needed for different prototypes; Get best practices for prototyping in a variety of mediums, and choose which prototyping software or components to use; Learn electronics prototyping basics and resources for getting started; Write basic pseudocode and translate it into usable code for Arduino; Conduct user tests to gain insights from prototypes.
