Titolo	Agroecological Approaches for Soil Health and Water Management
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022 Basel : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2022
Descrizione fisica	1 online resource (278 p.)
Soggetti	Biology, life sciences Research & information: general Technology, engineering, agriculture
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	In the last century, innovations in agricultural technologies centered on maximizing food production to feed the growing population have contributed to significant changes in agroecosystem processes, including carbon, nutrients, and water cycling. There are growing concerns regarding soil fertility depletion, soil carbon loss, greenhouse gas emissions, irrigational water scarcity, and water pollution, affecting soil health, agricultural productivity, systems sustainability, and environmental quality. Soils provide the foundation for food production, soil water and nutrient cycling, and soil biological activities. Therefore, an improved understanding of biochemical pathways of soil organic matter and nutrient cycling, microbial community involved in regulating soil health, and soil processes associated with water flow and retention in soil profile helps design better agricultural systems and ultimately support plant growth and productivity. This book, Agroecological Approaches in Soil and Water Management, presents a collection of original research and review papers studying physical, chemical, and biological processes in soils and discusses multiple ecosystem services, including carbon sequestration, nutrients and water cycling, greenhouse gas emissions, and agro-environmental sustainability. We covered tillage, nutrients, irrigation, amendments,

crop rotations, crop residue management practices for improving soil health, soil C and nutrient cycling, greenhouse gas emissions, soil water dynamics, and hydrological processes.

2. Record Nr.	UNINA9910159649603321
Autore	Mac John
Titolo	Pensée positive / / John Mac
Pubbl/distr/stampa	Copenhagen K., : SAGA Egmont, 2012
ISBN	2-8211-0338-7
Edizione	[Unabridged.]
Descrizione fisica	1 online resource (1 audio file) : digital
Classificazione	SEL027000
Altri autori (Persone)	LancrenonJuliette
Soggetti	Nonfiction Self-Improvement
Lingua di pubblicazione	Francese
Formato	Audiolibro
Livello bibliografico	Monografia
Note generali	Unabridged.
Sommario/riassunto	Il n'est pas toujours facile de rester optimiste et conquérant de nos jours, car les pressions subies sont multiples. C'est pourquoi nous vous proposons un guide très simple de la pensée positive, qui allie des exercices de respiration et de pensée positive, à une réflexion sur ce qu'est la pensée positive, et comment changer sa vie grâce à celle-ci. La notion de développement personnel a des significations différentes selon qu'elle est utilisée par des psychanalystes, des promoteurs de techniques New Age, certains courants du coaching, les éducateurs et spécialistes du travail... Les objectifs du développement personnel renvoient à la connaissance de soi, à la valorisation des talents et potentiels, à l'amélioration de la qualité de vie, à la réalisation de ses aspirations et de ses rêves, etc. Notre collection Développement Personnel se propose de vous guider dans cet apprentissage et accomplissement de soi.
