Sommario/riassunto	<p>"It is the year 2084. In the kingdom of Abista, named after the prophet Abi, earthly messenger of the god Yola, citizens submit to a single god, demonstrating their devotion by kneeling in prayer nine times a day. Autonomous thought has been banned, remembering is forbidden, and an omnipresent surveillance system instantly informs the authorities of every deviant act, thought, or idea. The kingdom is blessed and its citizens are happy, filled with a sense of purpose and piety. Those who are not, the heretics, are put to death by stoning or beheading in city squares. But Ati has met people who think differently; in ghettos and caves, hidden from the authorities, exist the last living heretics and free-thinkers of Abistan. Under their influence, Ati begins to doubt. He begins to think. Now, he will have to defend his thoughts with his life."</p> <p>--Amazon.com</p>
