

1. Record Nr.	UNINA9910160693103321
Autore	Sobel Dava <1947->
Titolo	Glass Universe, The: Hidden History of the Women Who Took the Measure of the Stars
Pubbl/distr/stampa	HarperCollins UK
ISBN	0-00-818189-6
Disciplina	520.922
Lingua di pubblicazione	Inglese
Formato	Musica
Livello bibliografico	Monografia
Sommario/riassunto	<p>AN OBSERVER BOOK OF THE YEAR'A peerless intellectual biography. The Glass Universe shines and twinkles as brightly as the stars themselves' The Economist#1 New York Times bestselling author Dava Sobel returns with a captivating, little-known true story of women in scienceIn the mid-nineteenth century, the Harvard College Observatory began employing women as calculators, or "human computers," to interpret the observations their male counterparts made via telescope each night. As photography transformed the practice of astronomy, the women turned to studying images of the stars captured on glass photographic plates, making extraordinary discoveries that attracted worldwide acclaim. They helped discern what the stars were made of, divided them into meaningful categories for further research, and even found a way to measure distances across space by starlight .Elegantly written and enriched by excerpts from letters, diaries,and memoirs, The Glass Universe is the hidden history of a group of remarkable women whose vital contributions to the burgeoning field of astronomy forever changed our understanding of the stars and our place in the universe.</p>
