

1. Record Nr.	UNINA9910161643003321
Autore	Smith G
Titolo	Evaluation of the Elevated Temperature Tensile and Creep-Rupture Properties of 3 to 9 Percent Chromium-Molybdenum Steels
Pubbl/distr/stampa	[Place of publication not identified], : American Society for Testing & Materials, 1975
ISBN	0-8031-8666-5
Descrizione fisica	1 online resource (211 pages)
Collana	ASTM data series publication ; ; DS 58
Disciplina	620.1623
Soggetti	Metals - Effect of high temperatures on Steel - Creep
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	This book represents a part of a continuing effort by The Metal Properties Council on behalf of the engineering community. Individuals and organizations generating additional information concerning the materials evaluated in this report, or in others in this series, are urged to make these data available to the Council for incorporation in future revisions. Address the Council at: The United Engineering Center, 345 East 47th St., New York, N.Y. 10017.
