

1. Record Nr.	UNINA9910161643503321
Autore	Howes James E. <1935->
Titolo	Interlaboratory Cooperative Study of the Precision of the Determination of the Average Velocity in a Duct (Pitot Tube Method)
Pubbl/distr/stampa	[Place of publication not identified], : American Society for Testing & Materials, 1974
ISBN	0-8031-8662-2
Descrizione fisica	1 online resource (ii, 60 pages) : illustrations
Collana	ASTM data series publication ; ; DS 55-S7
Disciplina	628.532
Soggetti	Flue gases Flow meters Pitot tubes
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	In 1971 in recognition of the important relationship between the measurement and the effective control of air pollution, American Society for Testing and Materials (ASTM) initiated a pioneering program, designated Project Threshold, to validate methods for measuring contaminants in the ambient atmosphere and in source emissions. The first phase of the program was devoted to evaluation of methods for measuring the content of nitrogen dioxide (D 1607-69), sulfur dioxide (D 2914-70T), dustfall (D 1739-70), total sulfation (D 2010-65), particulate matter (D 1704-61), and lead (D 3112) in the atmosphere(1-5).
