Sommario/riassunto	A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. Angloscene examines Afro-Chinese interactions within Beijing's aspirationally cosmopolitan student class. Jay Ke-Schutte explores the ways in which many contemporary interactions between Chinese and African university students are mediated through complex intersectional relationships with whiteness, the English language, and cosmopolitan aspiration. At the heart of these tensions, a question persistently emerges: How does English become more than a language—and whiteness more than a race? Engaging in this inquiry, Ke-Schutte explores twenty-first century Afro-Chinese encounters as translational events that diagram the

discursive contours of a changing transnational political order—one that will certainly be shaped by African and Chinese relations.

Sommario/riassunto	<p>This comprehensive volume reviews and synthesizes a vast body of knowledge on maladaptive aggression and antisocial behavior in youth. Written from a clinical-developmental perspective, and integrating theory and research from diverse fields, the book examines the origins, development, outcomes, and treatment of this serious problem in contemporary society. Major topics addressed include the types and prevalence of aggressive and antisocial behavior; the interplay among neuropsychiatric, psychosocial, and neurobiological processes in etiology; known risk and protective factors; gender variables; and why and how some children "grow out of" conduct disturbances. Chapters also discuss current approaches to clinical assessment and diagnosis and review the evidence for widely used psychosocial and pharmacological interventions.</p>
