Sommario/riassunto	Die Effizienz eines Alterssicherungssystems ist in der Wirtschaftspolitik sowohl aus mikroökonomischer als auch aus gesamtwirtschaftlicher Sicht von hoher Bedeutung. Die demographische Entwicklung führt in einem Umlageverfahren zu Fehlanreizen. Darüber hinaus wird dieser Effekt durch interpersonelle Umverteilungseffekte noch verschärft. Da diese Erkenntnis jedoch lediglich auf einer ex post Betrachtung beruht, greift sie zu kurz. In dieser Untersuchung wird deshalb, mit Hilfe des mikroökonomischen Theoriengerüsts, gezeigt, dass sowohl eine intra- als auch eine intergenerative Umverteilung innerhalb eines Umlageverfahrens ex ante das individuelle Einkommensrisiko im Alter verringern kann. Die Folge dieser Versicherungswirkung ist ein positiver Wohlfahrtseffekt.

Sommario/riassunto	"At a time when technological advances are transforming cultures and supporting new automated military operations, action films engage the senses and, in doing so, allow viewers to embody combat roles. This book argues that through film the viewer adapts to an ecology of fear, one that reflects global panic at the near-constant threat of conflict and violence. Often overwhelming in its audiovisual assault, action cinema attempts to overpower our bodies with its own through force and intensity. In this book, Steen Ledet Christiansen identifies five aspects central to how action films produce such physical movements and responses through vectors, droning, kinetics, telesomatics and volatility and in so doing unveils new modes of perception that acclimatise us for warfare. Drawing on theories from film-philosophy and a consideration of the aesthetics and phenomenology of war, this is an innovative study of the evolving action movie and its role in the targeted address of

battle. Chapters investigate new modes of cinematic experience through in-depth case studies of Iron Man, Avatar and the Jason Bourne trilogy, through to The Hurt Locker and Mad Max: Fury Road."
