Disciplina	994.01
Soggetti	Aboriginal Australians - Origin Human beings - Origin Mythology, Aboriginal Australian
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	"In their startling new book, Steven and Evan Strong challenge the "out-of-Africa" theory. Based on fresh examination of both the DNA and archeological evidence, they conclude that modern humans originated from Australia, not Africa. The original Australians (referred to by some as Aborigines), like so many indigenous peoples, are portrayed as "backward" and "primitive." Yet, as the Strongs demonstrate, original Australians had a rich culture, which may have sown the first seeds of spirituality in the world. They had the technology to make international seafaring voyages and have left traces in the Americas and possibly Japan, Southern India, Egypt, and elsewhere. They practiced brain surgery, invented the first hand tools, and had knowledge of penicillin. This book brings together 30 years of intensive research in consultation with elders in the original Australian community. Among their conclusions are the following: There is evidence that humans existed in Australia 40,000 years before they existed in Australia. There were migrations of original Australians in large boats throughout the Indian/Pacific rim. Three distinct kinds of Homo sapiens are found in Australia. There is evidence from the Americas that debunks the out-of-Africa theory. The spiritual influence of the Aborigines is reflected in

the religions of the world"--
