Sommario/riassunto

This book constitutes a primary data-supported, comprehensive
 grammar of Papiamentu. It analyzes spontaneous speech data from two
 varieties spoken in Aruba and Curacao. The author examines structural
 features so far unexplored in the areas of phonology, morphology,
 syntax, and aspects of sentential semantics. Particular attention is
 given to nominal classifiers, non-pro-drop syntactic constructions, and
 absolute tense marking, traits that are rarely described in regards to
 Creole or Romance languages. Researchers interested in formal
 analyses of Papiamentu, Creole languages, and in language contact will
 find this book an indispensable tool.
