

1. Record Nr.	UNINA9910163006103321
Titolo	Photoactive Semiconductor Nanocrystal Quantum Dots : Fundamentals and Applications / / edited by Alberto Credi
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-51192-0
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (VIII, 174 p. 96 illus., 78 illus. in color.)
Collana	Topics in Current Chemistry Collections, , 2367-4067
Disciplina	541
Soggetti	Chemistry, Physical and theoretical Semiconductors Nanotechnology Nanochemistry Physical Chemistry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Excited-State Dynamics in Colloidal Semiconductor Nanocrystals -- Semiconductor Quantum Dots with Photoresponsive Ligands -- Interfacing Luminescent Quantum Dots with Functional Molecules for Optical Sensing Applications -- Light-Harvesting Antennae Based on Silicon Nanocrystals -- Luminescent Rare-earth-based Nanoparticles: A Summarized Overview of their Synthesis, Functionalization, and Applications -- Recent Progress in Quantum Dot Based White Light-Emitting Devices -- Hybrid Semiconductor–Metal Nanorods as Photocatalysts. <or biological="" applications -- qds="" in="" biomolecular="" devices -- luminescent="" heteronanocrystals.
Sommario/riassunto	The series Topics in Current Chemistry Collections presents critical reviews from the journal Topics in Current Chemistry organized in topical volumes. The scope of coverage is all areas of chemical science including the interfaces with related disciplines such as biology, medicine and materials science. The goal of each thematic volume is to give the non-specialist reader, whether in academia or industry, a comprehensive insight into an area where new research is emerging which is of interest to a larger scientific audience. Each review within

the volume critically surveys one aspect of that topic and places it within the context of the volume as a whole. The most significant developments of the last 5 to 10 years are presented using selected examples to illustrate the principles discussed. The coverage is not intended to be an exhaustive summary of the field or include large quantities of data, but should rather be conceptual, concentrating on the methodological thinking that will allow the non-specialist reader to understand the information presented. Contributions also offer an outlook on potential future developments in the field.
