|--------------------|--|
| Sommario/riassunto | The projects in the Future Megacities programme gain valuable<br>experiences in developing energy efficient standards and urban<br>structures with adequate conditions to treat resources with care and<br>avoid unnecessary emissions. To achieve the ambitious objectives, it is<br>essential to convince and enable people to take an active part in<br>sustainable development. This requires qualification and education<br>efforts at different levels, with different target groups and for different<br>topics. This volume presents several proven and evaluated capacity<br>building measures. Proper workmanship, individual responsi |
