

1. Record Nr.	UNINA9910163020403321
Titolo	Human papillomavirus : bench to bedside // volume editors, Marigdalia K. Ramirez-Fort [and three others]
Pubbl/distr/stampa	Basel, Switzerland : , : Karger, , 2014 ©2014
ISBN	3-318-02527-5
Descrizione fisica	1 online resource (282 p.)
Collana	Current Problems in Dermatology, , 1421-5721 ; ; Volume 45
Disciplina	616.911
Soggetti	Papillomavirus diseases Papillomaviruses
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and indexes.

Sommario/riassunto

Human papillomavirus (HPV) infection transcends multiple fields of science and medicine. The management of HPV-related disease is demanding and often requires a persistent multimodal approach involving various medical disciplines. In this volume, experts present a comprehensive view of HPV research with an emphasis on clinical presentations, diagnosis, management and vaccine development. The state of the art in molecular biology is provided in addition to discussions on clinical morphology and the utility of dermatoscopy in identifying HPV disease. In a multidisciplinary approach to dermatological, plastic and reconstructive, gynecological, otolaryngological and colorectal management, different treatment strategies are highlighted. Finally, Dr. Neil Christensen discusses viral immunology, and the difficulties and successes in the development of an HPV vaccine. Bringing together basic science and clinical information on HPV, this book is an excellent resource and reference for all researchers and clinicians who encounter human papillomavirus-related disease.
