Sommario/riassunto	The Mishnah - the second-century law code that lays the foundation, after Scripture, of normative Judaism - encompasses all subjects that pertain to the life of the Jewish nation and as such provides a systematic basis for Israel's social order and world view. Any social program has its own politics, economics, and philosophy which together define a given social entity rather than any other. And any system defining the structure of a society strives to establish a set of harmonised and coherent fundamental principles, viewpoints and attitudes in treating the components of its theory of the community. It has been long shown that the Mishnah is such a well-composed theory of world-construction. It is demonstrated here how its specific message concerning the politics and economics that define the social order recapitulate those of Aristotle.
