

1. Record Nr.	UNINA9910163141703321
Autore	Gotzner Nicole
Titolo	Alternative Sets in Language Processing : How Focus Alternatives are Represented in the Mind / / by Nicole Gotzner
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Macmillan, , 2017
ISBN	3-319-52761-4
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (xiv,162 pages) : 15 illustrations, 12 illustrations in color.)
Collana	Palgrave Studies in Pragmatics, Language and Cognition
Disciplina	410
Soggetti	Linguistics Psycholinguistics Cognitive grammar Semantics Pragmatics Phonology Theoretical Linguistics Cognitive Linguistics Phonology and Phonetics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Chapter 1. Introduction -- Chapter 2. Theoretical and empirical background -- Chapter 3. Long-term representation of the entire alternative set -- Chapter 4. The mechanisms of activation and competitive inhibition -- Chapter 5. What's included in the set of alternatives? -- Chapter 6. Contrastive pitch accents and focus particles -- Chapter 7. Conclusions.
Sommario/riassunto	This book presents a novel experimental approach to investigating the mental representation of linguistic alternatives. Combining theoretical and psycholinguistic questions concerning the nature of alternative sets, it sheds new light on the theory of focus and the cognitive mechanisms underlying the processing of alternatives. In a series of language comprehension experiments, the author shows that

intonational focus and focus particles such as 'only' shape the representation of alternatives in a listener's mind in a fundamental way. This book is relevant to researchers interested in semantics, pragmatics, language processing and memory. Nicole Gotzner is a postdoctoral researcher at the Centre for General Linguistics (ZAS) in Berlin, Germany. She is affiliated with the DFG Priority Programme Xprag.de "New Pragmatic Theories Based on Experimental Evidence". Her research combines semantic and pragmatic theory with language processing and child language acquisition.
