۱.	Record Nr.	UNINA9910163148503321
	Autore	Iordache Octavian
	Titolo	Implementing Polytope Projects for Smart Systems / / by Octavian Iordache
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
	ISBN	3-319-52551-4
	Edizione	[1st ed. 2017.]
	Descrizione fisica	1 online resource (XXI, 185 p. 139 illus. in color.)
	Collana	Studies in Systems, Decision and Control, , 2198-4182 ; ; 92
	Disciplina	006.3
	Soggetti	Computational intelligence
		Manufactures
		Engineering design Control engineering
		Computational Intelligence
		Manufacturing, Machines, Tools, Processes
		Engineering Design
		Control and Systems Theory

in industry. Polytope projects facilitate the utilization of smart systems and structures as key elements of the fourth industrial revolution. The book begins by presenting polytope projects as a reference architecture for cyber-physical systems and smart systems, before addressing industrial process synthesis in Chapter 2. Flow-sheet trees, cyclic separations and smart configurations for multi-component separations are discussed here. In turn, Chapter 3 highlights periodic features for drug delivery systems and networks of chemical reactions, while Chapter 4 applies conditioned random walks to polymers and smart materials structures. Chapter 5 examines self-assembly and selfreconfiguration at different scales from molecular to micro systems. Smart devices and technologies are the focus of chapter 6. Modular micro reactor systems and timed automata are examined in selected case studies. Chapter 7 focuses on inferential engineering designs, concept-knowledge, relational concept analysis and model driven architecture, while Chapter 8 puts the spotlight on smart manufacturing, industry 4.0, reference architectures and models for new product development and testing. Lastly, Chapter 9 highlights the polytope projects methodology and the prospects for smart systems and structures. Focusing on process engineering and mathematical modeling for the fourth industrial revolution, the book offers a unique resource for engineers, scientists and entrepreneurs working in chemical, biochemical, pharmaceutical, materials science or systems chemistry, students in various domains of production and engineering, and applied mathematicians. .
