Sommario/riassunto	Drake Morgan is a witch. He is also the leader of the largest and most powerful coven in the United States. As he fights enemies, both without and within, he continues his search for the one woman, his complement, who can help him protect his people from the dark machinations of a twisted follower of chaos magick. Since her move to Chicago to take possession of her inheritance from her grandmother, Rhea Brown has heard strange voices and experienced phenomena that can not be explained away in a rational manner. Her cynical lawyer's mind tells her she is over-stressed and imagining things. When a dark-haired lover starts visiting her in her dreams, both sleeping and waking, she learns that magick can be real.
