Sommario/riassunto	Skin tumors are very often encountered in clinical practice but can be difficult to diagnose since the skin's histological complexity gives rise to many types and subtypes. This superb atlas presents an unrivalled wealth of original high-quality clinical photographs of almost all benign and malignant skin tumors. The diverse subtypes and clinical forms, including different localizations, are depicted, and careful attention is paid to evolution and follow-up. While the main focus is on the clinical presentation as reflected in the photographs, diagnostic clues and management considerations are also summarized in a straightforward,

readily understandable way. The atlas has been designed so that it will meet clinical needs and allow rapid identification of clues relevant to daily practice. Clinical Atlas of Skin Tumors will be valuable for all dermatologists in training, as well as for those who are already established in the profession or in allied specialties such as plastic surgery and oncology.

Sommario/riassunto	David is the small boy who is always asking questions. Simon and Ines take care of him in their new town, Estrella. He is learning the language; he has begun to make friends. He has the big dog Bolivar to watch over him. But he'll be seven soon and he should be at school. And so, with the guidance of the three sisters who own the farm where Simon and Ines work, David is enrolled in the Academy of Dance. It's here, in his new golden dancing slippers, that he learns how to call down the numbers from the sky. But it's here, too, that he will make troubling discoveries about what grown-ups are capable of. In this mesmerizing allegorical tale, Coetzee deftly grapples with the big questions of growing up, of what it means to be a "parent," the constant battle between intellect and emotion, and how we choose to live our lives.
