POMASL -- SURVIVAL NARRATIVE BY MAJOR PHILLIP B. MAY -- APPENDIX VII - Performance Data on Types of Aircraft Used by Marines in the Philippines -- APPENDIX VIII - Navy Unit Commendations.

Sommario/riassunto

Marine Aviation in the Philippines by Major Charles W. Boggs, Jr. provides a detailed account of the role played by Marine aviators during the reconquest of the Philippines in World War II. The book highlights the strategic importance of the 1944 campaign, detailing the Marine Corps' operations and their significant contribution to the Allied victory. The focus is on the Marine airmen's pioneering use of close air support tactics, which were tested extensively in conventional land operations. The monograph, part of a series by the Historical Division of the U.S. Marine Corps, serves as a factual resource for military students and history enthusiasts, documenting the contributions of Marine aviation within the broader context of Army and Navy operations. The work includes comprehensive documentation and maps to provide a clear perspective on military strategies and engagements.
