

1. Record Nr.	UNINA9910163866303321
Autore	Ambrus A (Arpad)
Titolo	Food safety assessment of pesticide residues // editors, Arpad Ambrus, Denis Hamilton
Pubbl/distr/stampa	New Jersey : , : World Scientific, , 2017 ©2017
ISBN	1-78634-169-7
Descrizione fisica	1 online resource (568 pages) : illustrations, tables
Classificazione	56.04.20.08
Disciplina	363.19/2
Soggetti	Pesticide residues in food Food - Safety measures food security pesticide residue pollution from agricultural sources
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from PDF file title page (viewed March 8, 2017).
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Sommario/riassunto	"Pesticides are now accepted as an integral part of modern agricultural production. This book provides analysis of the steps taken by national and international bodies working towards a cohesive global strategy for evaluating the safety of residues in food that result from approved pesticide uses. Also described is the role of the UN Food and Agriculture Organization (FAO), World Health Organization (WHO) and Codex Alimentarius in developing standards that protect the health of the consumers and ensure fair practices in the food trade. It goes on to look at the promotion of good agricultural practice in the use of pesticides and the need for control in their practical use. These include sampling, testing the compliance of marketed products against legal limits and verifying the effectiveness of the safety-based regulatory measures. This is a specialist book for those looking to go into the field of international food safety, for students and lecturers studying the topic, for policy makers working on public health and agricultural issues, and personnel responsible for taking samples and performing

the analysis of pesticide formulations and residues."--Publisher's website.
