Nota di contenuto

pt. I. Introduction -- pt. II. Convergence : the dominance of national states in agenda setting -- pt. III. Divergence : active city-regions pursuing their own policing agendas -- pt. IV. Conclusion.

Sommario/riassunto

Understanding the politics of security in city-regions is increasingly important for the study of contemporary policing. This book argues that national and international governing arrangements are being outflanked by various transnational threats, including the cross-border terrorism of the attacks on Paris in 2015 and Brussels in 2016; trafficking in people, narcotics and armaments; cybercrime; the deregulation of global financial services; and environmental crime. Metropolises are the focal points of the transnational networks through which policing problems are exported and imported across national borders, as they provide much of the demand for illicit markets and are the principal engines generating other policing challenges including political protest and civil unrest. This edited collection examines whether and how governing arrangements rooted in older systems of national sovereignty are adapting to these transnational challenges, and considers problems of and for policing in city-regions in the European Union and its single market. Bringing together experts from across the continent , Policing European Metropolises develops a sociology of urban policing in Europe and a unique methodology for comparing the experiences of different metropolises in the same country. This book will be of value to police researchers in Europe and abroad, as well as postgraduate students with an interest in policing and urban policy.
