Sommario/riassunto	This edited volume offers a thorough review of peacekeeping theory and reality in contemporary contexts, and aligns the two to help inform practice. Recent United Nations peacekeeping operations have challenged the traditional peacekeeping principles of consent, impartiality and the minimum use of force. The pace and scope of these changes have now reached a tipping point, as the new mandates are fundamentally challenging the continued validity of the UN peacekeeping's core principles and identity. In response the volume analyses the growing gap between these actual practices and existing UN peacekeeping doctrine, exploring how it undermines the effectiveness of UN operations, and endangers lives, arguing that a

common doctrine is a critical starting point for effective multi-national operations.
