Sommario/riassunto	This compilation brings together activities based on the "Everyday Engineering" columns from the NSTA journal Science Scope. Thirteen hands-on investigations focus on three aspects of engineering: designing and building, reverse engineering to learn how something works, and constructing and testing models. Each lesson includes in-depth teacher background information, expected sample data, a materials list, and a student activity sheet for recording results.

Sommario/riassunto	Motivated by ongoing debates over welfare state retrenchment and growing economic insecurity, this book compares the situation of older workers in Germany and the United States over the past three decades. Both nations are seeing a rise in insecurity for older workers, but the differences in support programs, pensions, and retirement options

have led to differing outcomes for workers faced with early retirement or job loss.
