Sommario/riassunto	This reference manual provides a list of approximately 300 technical terms and phrases common to Environmental and Civil Engineering which non-English speakers often find difficult to understand in English. The manual provides the terms and phrases in alphabetical order, followed by a concise English definition, then a translation of the term in Thai and, finally, an interpretation or translation of the term or phrase in Thai. Following the Thai translations section, the columns are reversed and reordered alphabetically in Thai with the English term and translation following the Thai term or phrase. The objective is to provide a Technical Term Reference manual for non-English speaking students and engineers who are familiar with Thai, but uncomfortable with English and to provide a similar reference for English speaking students and engineers working in an area of the world where the Thai language predominates.
