Sommario/riassunto In November 1864, Abraham Lincoln penned what is known as the "Bixby Letter" offering his condolences to the mother of five soldiers who had fallen in the service of their country. A shocking sacrifice for the cause for any one family to make, although it transpired not all of the sons were in fact dead. Some years earlier the last surviving member of his generation of the Fernyhough family, from Staffordshire in England, wrote the stories of his brothers and himself. Robert Fernyhough's brothers, John and Henry in the Royal Marines and Thomas in the infantry, had fallen in the service of their country during the Napoleonic Wars. Robert himself saw much action as a Royal Marine before eventually fighting in the 95th Rifles in the Peninsular under Wellington, including heavy engagement at the battle of Busaco. The fighting record of the Fernyhough family that is recorded in this work is truly astonishing; Expeditions to Walcheren, Buenos Ayres, Walcheren, the coast of Spain, Savoy, Toulon, Malta, Gibraltar not to mention hard soldiering in the Peninsular make for an excellent Read. Author - Robert Fernyhough (1785-1866)

Sommario/riassunto

Different genetic diagnostic and treatment options are used worldwide to improve routine IVF procedures for the benefit of patients. This handbook updates the new genetic diagnostic technologies that have been translated to the clinic, aiming to improve outcomes in the clinic and result in a healthy baby in the home. Chapters cover the use of genetic technologies in a personalized manner to unravel the possible genetic risks for the couple wishing to conceive, in terms of sperm, the embryo, the endometrium, miscarriage, and finally the fetus. This expanded new edition covers the range of the latest genetic diagnostic technologies being translated into practice internationally to improve routine IVF procedures for the benefit of patients. Bringing together international experts to discuss their work, this text gives a context for the developments in this very fast-moving area of research and offers a comprehensive and rounded appraisal of hot topics.
