Sommario/riassunto

This is the first book to address all aspects of the biology of autoantibodies in a single volume, including a discussion of immunology, experimental models, clinical aspects, and the use of autoantibodies as probes in molecular and cellular biology. The editor, currently professor at the W.M. Keck Autoimmune Disease Center of The Scripps Research Institute, has assembled an all-star team of authors to report on the latest research, technologies, and applications. Following an introductory chapter, the book goes on to cover such topics as cellular mechanisms of autoantibody production, cli

Sommario/riassunto

The situation in 1800 was not auspicious for the new born French Republic, Napoleon Bonaparte, as he then was, had with some aid from his family, fellow army officers and politicians, overthrown the venal and corrupt Directory. However France was menaced on its German borders by a vast Austrian army and a further large Austrian army bearing down on the Var and Nice in Northern Italy. Most of the gains won by Bonaparte in his first campaign ending in the triumphant battle of Rivoli had been lost, Switzerland had only just been saved by a masterful campaign by Massena. Bonaparte attacked the problem with energy, activity and genius, although not secure on a throne he had to balance the ego of his main military rival Moreau, he embarked on a risky gamble to take an army across the Alps and shatter the Austrians in Italy. Herbert Sargent's book follows Bonaparte's first campaign as First Consul of the French Republic as he drives, organizes and masterminds his very own blitzkrieg across the Alps. As a serving officer in the American Army, who saw active service in a number of the late 19th and early 20th Century campaigns of the United States, he is well qualified to pass his opinion on Napoleon's brilliant campaign. It would be this campaign that would be the bedrock for the political machinations that would see Napoleon crowned as Emperor of the French some four years later. A classic account of a campaign not much covered in Napoleonic literature. Author - Herbert H. Sargent - (1858-1921)

Sommario/riassunto	This volume contains a collection of papers aimed at revealing and investigating the various aspects of Protestantism throughout the centuries. Although several generations of theologians, historians, linguists, or even literary historians have sought to elucidate the complexity of Protestant ethos and its influence on social, spiritual, intellectual and economic processes in Europe. (Des articles en anglais et en allemand)
