

1. Record Nr.	UNINA9910777793003321
Autore	McKee Geoffrey R
Titolo	Why mothers kill [[electronic resource]] : a forensic psychologist's casebook / / Geoffrey R. McKee
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2006
ISBN	0-19-026193-5 1-280-70451-9 0-19-804029-6 1-4294-2008-1
Descrizione fisica	1 online resource (301 p.)
Disciplina	364.3/74
Soggetti	Filicide Infanticide Women murderers Mothers - Psychology Forensic psychology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 261-282) and index.
Nota di contenuto	Introduction -- Neonaticide, infanticide, and filicide research: what do we know? -- Classification of maternal filicide: what do we know? -- Risk analysis and the maternal filicide risk matrix -- Prevention and risk intervention points -- Detached mother, denial type: Cathy -- Detached mother, ambivalent type: Edna -- Detached mother, resentful type: Francine -- Detached mother, exhausted type: Glenda -- Abusive/neglectful mother, recurrent type: Harriet -- Abusive/neglectful mother, reactive type: Janet -- Abusive/neglectful mother, inadequate type: Kaye -- Psychotic/depressed mother, delusional type: Barbara -- Psychotic/depressed mother, impulsive type: Susan Smith -- Psychotic/depressed mother, suicidal type: Marilyn -- Retaliatory mother: Olivia -- Psychopathic mother, financial type: Pauline -- Psychopathic mother, addicted type: Samantha -- Psychopathic mother, narcissistic type: Rhonda -- Final thoughts: what have we learned and what do we need to do?.
Sommario/riassunto	Annually, hundreds of infants and young children perish at the hands

of their mothers. This book uses more than a dozen case studies to help us understand, and most importantly, prevent these horrific events from occurring. It is suitable for students, as well as mental health and medical professionals.

Disciplina	917.98042999999996
Soggetti	Landscapes Conservationists Natural history
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	John Muir was born in Scotland on April 21st, 1838. His Father wanted his children to have a stricter Religious upbringing and therefore moved the family to the United States. John Muir is perhaps known today as the most pre-eminent naturalist and advocate for the preservation of much of the western United States. Today being an environmentalist is laudable but in Muir's days the country was there to be exploited but by hard work and lobbying Muir did much to turn such beautiful areas as Yosemite into protected National Parks. His writing is not only an invaluable guidebook to these unspoilt places but also a hymn to their spirituality. As a keen scientific mind he helped to push the understanding of nature forward by observing and writing upon the glaciers and their actions in eroding and shaping much of the land. Muir helped to also create The Sierra Club, which he led for many years,

on projects to preserve these and other areas of outstanding natural beauty. He was equally adept at persuading politicians, from Presidents to local State officials, and the common man to come together in the defence of Nature.
