

1. Record Nr.	UNINA9910164134503321
Titolo	Selected topics on electroweak interactions, neutrinos and QCD : a review of high energy colliders : 26th International Meeting on Fundamental Physics, Isla de la Toja, Galicia, Spain, 1-5 June 1998 // editor, B. Adeva
Pubbl/distr/stampa	Singapore : , : World Scientific, , 1999 ©1999
ISBN	981-4527-28-9
Descrizione fisica	1 online resource (372 pages) : illustrations
Disciplina	539.7544
Soggetti	Electroweak interactions Neutrinos Quantum chromodynamics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from PDF title page (viewed March 30, 2017).
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Sommario/riassunto	"This volume provides a broad picture of the current understanding of electroweak and strong interactions, according to most recent experimental results from some of the world's largest particle accelerators: LEP II, Tevatron, HERA and SPS. Special attention is given to CP violation, the Higgs boson search, and precision tests of the electroweak theory. Although generally oriented, the contributions are targeted at postgraduate students in particle physics."--Publisher's website.
