

1. Record Nr.	UNINA9910164289303321
Autore	Beard Michael E
Titolo	Advances in Environmental Measurement Methods for Asbestos
Pubbl/distr/stampa	[Place of publication not identified], : American Society for Testing & Materials, 1999
ISBN	9780803162105 0803162103
Descrizione fisica	1 online resource (416 pages)
Collana	ASTM special technical publication ; ; 1342
Disciplina	666/.72
Soggetti	Asbestos dust - Environmental aspects Asbestos abatement
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	Annotation Thirty papers focus on recent advances in research on measurement methods for asbestos in bulk building materials, as well as ambient, indoor, and work place air, water, and settled dust. The papers include discussions of measurement methods, monitoring strategies, data interpretation, and quality assurance for asbestos measurements. It was the intent of the organizers of the July 1997 conference from which these papers stem to bring the disciplines of analytical chemistry together with investigators who are assessing exposure to asbestos in the environment.
