Autore	Tarascon Jean-Marie
Titolo	Energy: Electrochemical Storage and Sustainable Development : Inaugural Lecture delivered on Thursday 9 December 2010 // Jean-Marie Tarascon
Pubbl/distr/stampa	Paris, : Collège de France, 2017
ISBN	2-7226-0283-0
Altri autori (Persone)	CorvolPierre TarasconJean-Marie
Soggetti	Environmental Studies History & Philosophy Of Science sustainable development nanotechnology green chemistry energy environment lithium-ion battery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The storage and conversion of energy is one of the major scientific challenges of the decades to come, with high stakes for the environment. What new materials will allow for more efficient and “cleaner” batteries to be developed? Jean-Marie Tarascon reviews these issues and their implications for our future and that of the planet. In particular, he discusses lithium-ion technology, the contribution of nanotechnologies, and current research using bio-inspired methods to develop innovations su...
