

1. Record Nr.	UNINA9910164723303321
Titolo	Automotive Gasoline Performance and Information System
Pubbl/distr/stampa	[Place of publication not identified], : American Society for Testing & Materials, 1973
ISBN	0-8031-4620-5
Descrizione fisica	1 online resource (6 pages)
Disciplina	665.5
Soggetti	Petroleum
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	The purpose of the Automotive Gasoline Performance and Information System is to provide a set of consumer-oriented performance standards for motor gasolines, with understandable symbols that indicate to the consumer the characteristics of the product and the level of its performance regardless of season or location. While the system was developed primarily for gasolines used in passenger cars and light trucks, it is generally applicable to gasolines used in other vehicles and equipment.
