

1. Record Nr.	UNINA9910164730403321
Autore	Dickson Kenneth L
Titolo	Biological Data in Water Pollution Assessment: Quantitative and Statistical Analyses
Pubbl/distr/stampa	[Place of publication not identified], : American Society for Testing & Materials, 1978
ISBN	9780803147225 0803147228
Descrizione fisica	1 online resource (184 pages)
Disciplina	628.161
Soggetti	Water quality biological assessment
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Optimal impact study design and analysis -- R.H. Green A comparison of two methods for estimating the parameters of a truncated normal distribution -- James Hansen and Scott Zeger Estimating the totaal number of species in a biological community -- John Slocomb and K. L. Dickson Statistical methods applied to a four-year multivariate study of a Florida estuarine system -- D.A. Meeter and R.J. Livingston Use of ranking methods to assess environmental data -- S.M. Gertz A multivariate procedure for comparing control areas to possible impact areas, graphically displaying the results -- J.D. Callahan and John Palmer Use of indices of diversity and hierarchical diversity in stream surveys -- R.L. Kaesler, E.E. Hendricks, and J.S. Crossman Statistical analysis of the presence-absence component of species composition data -- J.A. Hendrickson, Jr Maximum weekly average temperature for 316(a) demonstrations -- F.A. Ferraro, A.E. Gaulke, and C.M. Loeffelman A statistical technique for analyzing time-response curves -- Tom Capizzi and D.T. Burton Use of rarefaction and related methods in ecology -- Daniel Simberloff Sampling design for some trace elemental distributions in New York Bight sediments -- S.B. Saila, E.L. Anderson, and H.A. Walker.
Sommario/riassunto	This publication on Biological Data in Water Pollution Assessment: Quantitative and Statistical Analyses contains papers presented at a symposium held 20-21 June 1977 at Minneapolis, Minnesota. The

symposium was sponsored by the American Society for Testing and Materials through its Committee D19 on Water in cooperation with The Center for Environmental Studies at Virginia Polytechnic Institute and State University. K. L. Dickson and John Cairns, Jr., Virginia Polytechnic Institute and State University, and R. J. Livingston, Florida State University, served as symposium cochairmen and editors of this publication.
