Sommario/riassunto	This ebook consists of a summary of the ideas, viewpoints and facts presented by John Perkins in his book "Confessions of an Economic Hit Man". This summary offers a concise overview of the entire book in less than 30 minutes reading time. However this work does not replace in any case John Perkins' book. Perkins reveals how during his career he created economy projections to convince other countries to accept important loans for infrastructure and development that they couldn't afford.
