Sommario/riassunto	"Archaeologies of 'Us' and 'Them' explores the concept of indigeneity within the field of archaeology and heritage and in particular examines the shifts in power that occur when 'we' define 'the other' by categorizing 'them' as indigenous. Recognizing the complex and shifting distinctions between indigenous and non-indigenous pasts and presents, this volume gives a nuanced analysis of the underlying definitions, concepts and ethics associated with this field in order to explore indigenous archaeology as a theoretical, ethical and political

concept"--Provided by publisher.
