| Sommario/riassunto      | Migrating borders and moving times analyses migrant border crossings in relation to their everyday experiences of time and connects these to  |

wider social and political structures. Sometimes border crossing takes no more than a moment; sometimes hours; some crossers find themselves in the limbo of detention; for others, the crossing lasts a lifetime to be interrupted only by death. Borders not only define separate spaces, but different temporalities. This book provides both a single interpretative frame and a novel approach to border crossing: an analysis of the reconfiguration of memory, personal and group time that follows the migrants' renegotiation of cross-border space and recalibrations of temporality.
