

1. Record Nr.	UNINA9910169658103321
Autore	Ulm Sean
Titolo	Coastal themes an archaeology of the Southern Curtis Coast, Queensland
Pubbl/distr/stampa	[Place of publication not identified], : ANU E Press, 2006
Edizione	[1st ed.]
Descrizione fisica	1 online resource (340 pages)
Collana	Terra Australis Series
Disciplina	994.01
Soggetti	History & Archaeology Regions & Countries - Australia & Pacific Islands - Oceania
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Terra Australis 24 -- Foreword -- Acknowledgements -- Contents -- List of Figures -- List of Tables -- 1. Introduction: investigating the archaeology of the southern Curtis Coast -- 2. The study region: the southern Curtis Coast -- 3. Methods of investigation -- 4. Marine and estuarine reservoir effects in central Queensland -- 5. Bivalve conjoin analyses: assessing site integrity -- 6. Seven Mile Creek Mound -- 7. Mort Creek Site Complex -- 8. Pancake Creek Site Complex -- 9. Ironbark Site Complex -- 10. Eurimbula Creek 1 -- 11. Eurimbula Creek 2 -- 12. Eurimbula Site 1 -- 13. Tom's Creek Site Complex -- 14. Synthesis of results: towards an archaeology of the southern Curtis Coast -- 15. Wider implications and conclusions -- References -- Appendices -- Appendix 1: Radiocarbon dates: technical data -- Appendix 2: Recorded archaeological sites on the southern Curtis Coast -- Appendix 3: Site name synonyms for recorded sites on the southern Curtis Coast -- Appendix 4: Excavation data -- Appendix 5: Shellfish reference collection.
Sommario/riassunto	Coastal archaeology in Australia differs in many respects from that of other areas, with the potential to examine relatively fine-scale variation. Nevertheless, there has been a general tendency in Australian archaeology to play down the variability and to subsume the evidence into broader homogenising models of Aboriginal cultural change.
