Feminisms, boundaries and reconfigured identities; The emotionally 'expressive' body; Pain and the 'dys-appearing' body The 'dormant' body: sleep, night-time and dreams Artistic bodies: representation and resistance; Conclusions; Notes; References; Index
Sommario/riassunto	The Lived Body takes a fresh look at the notion of human embodiment and provides an ideal textbook for undergraduates on the growing number of courses on the sociology of the body. The authors propose a new approach - an 'Embodied Sociology' - one which makes embodiment central rather than peripheral. They critically examine the dualist legacies of the past, assessing the ideas of a range of key

thinkers, from Marx to Freud, Foucault to Giddens, Deleuze to Guattari and Irigary to Grosz, in terms of the bodily themes and issues they address. They also explore new areas of research
