Sommario/riassunto	"Since the first edition of E-learning by Design, e-learning has evolved rapidly and fringe techniques have moved into the mainstream. Underlying and underwriting these changes in e-learning are advances in technology and changes in society. The second edition of the bestselling book E-Learning by Design offers a comprehensive look at the concepts and processes of developing, creating, and implementing a successful e-learning program. This practical, down-to-earth

resource is filled with clear information and instruction without over simplification. The book helps instructors build customized e-learning programs from scratch—building on core principles of instructional design to: develop meaningful activities and lessons; create and administer online tests and assessments; design learning games and simulations; and implement an individualized program." -- Publisher's description.

Sommario/riassunto	This book provides theoretical and empirical discussion of migration, identity and Europeanisation. With contributions from leading international scholars, it provides both an overview of theoretical

perspectives and a comprehensive set of case studies, covering both Eastern and Western Europe. Contributors draw from disciplines such as historical sociology, discourse analysis, social psychology and migration studies, while the editors bring these subjects into a coherent theoretical and historical framework, to discuss the emergence of new collective identities and new borders in Europe today
