P. Thompson -- Christopher Pallis -- Colin Ward -- Conclusion.
Sommario/riassunto	From William Morris to Oscar Wilde to George Orwell, left-libertarian thought has long been an important but neglected part of British cultural and political history. In Anarchist Seeds beneath the Snow, David Goodway seeks to recover and revitalize that indigenous anarchist tradition. This book succeeds as simultaneously a cultural history of left-libertarian thought in Britain and a demonstration of the applicability of that history to current politics. Goodway argues that a recovered anarchist tradition could - and should - be a touchstone for contemporary political radicals. Moving seamlessly from Aldous Huxley and John Cowper Powys to the war in Iraq, this challenging volume will energize leftist movements throughout Britain and the rest of the

world.

4. Record Nr.	UNINA9910208827303321
Titolo	Commodity chains and world cities // edited by Ben Derudder and Frank Witlox
Pubbl/distr/stampa	Malden, MA., : Wiley-Blackwell, 2010

interaction: urban places in the system of chains / Markus Hesse -- Integrating world cities into production networks: the case of port cities / Wouter Jacobs, Cesar Ducruet and Peter De Langen -- Intra-firm and extra-firm linkages in the knowledge economy: the case of the emerging mega-city region of Munich / Stefan Luthi, Alain Thierstein and Viktor Goebel -- Making connections: global production networks and world city networks / Neil M. Coe ... [et al.] -- Global inter-city networks and commodity chains: any intersections? / Saskia Sassen -- Index.

Sommario/riassunto

"Transnational spatial relations offer a key point from which to study the geographies of contemporary globalization. This book assesses the possible cross-fertilization between two of the most notable analytical frameworks in this area: the world city network (WCN) framework, in which researchers have studied the emergence of a globalized urban system; and secondly, the global commodity chain (GCC) framework, in which researchers have scrutinized the interconnected functions, operations and transactions through which specific goods are produced, distributed and consumed in a globalized economy. Both literatures have emerged as critiques of conventional, state-centric social science interpretations of their subject matters, and they both propose what might be called 'global network alternatives'. Bringing together contributions of key researchers from human geography, economics, and sociology, the editors take advantage of this parallel to investigate how both models may benefit from each other"--
