

1. Record Nr.	UNINA9910208829703321
Autore	Har Jason
Titolo	Advanced computational dynamics of particles, materials and structures [[electronic resource]] : [a unified approach] // Jason Har and Kumar K. Tamma
Pubbl/distr/stampa	West Sussex [England], : John Wiley & Sons, 2012
ISBN	1-119-96693-0 1-119-96590-X 9786613688859 1-119-96589-6 1-280-77846-6 1-119-96692-2
Descrizione fisica	xxiv, 686 p. : ill
Altri autori (Persone)	TammaKumar K
Disciplina	531/.163
Soggetti	Dynamics Dynamics - Data processing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. N-body dynamical systems -- pt. 2. Continuous-body dynamical systems -- pt. 3. The time dimension.
Sommario/riassunto	"Advanced Computational Dynamicsof Particles, Materials, and Structures: A Unified Approach breaks new ground with its in-depth, detailed coverage of modern computational mechanics in particle and continuum dynamics. Kumar Tamma provides a unique blend of classical and innovative theoretical and computational approaches that cover both particle dynamics and flexible continuum structural dynamics applications. He covers both traditional methods and new developments & perspectives in both time and space discretization, encompassing classical Newtonian, Lagrangian, and Hamiltonian mechanics as well as new and alternate contemporary approaches and their equivalences to address various problems in engineering sciences and physics. The completeness and depth of coverage makes Advanced Computational Dynamics of Particles, Materials, and Structures an invaluable reference for both engineers and researchers working in the
