Engines of life : identity and beyond death -- pt. VI. Enhanced decision-making -- pt. VII. Biopolitics and policy -- pt. VIII. Future trajectories : singularity -- pt. IX. The world's most dangerous idea.

Sommario/riassunto

The first authoritative and comprehensive survey of the origins and current state of transhumanist thinking The rapid pace of emerging technologies is playing an increasingly important role in overcoming fundamental human limitations. Featuring core writings by seminal thinkers in the speculative possibilities of the posthuman condition, essays address key philosophical arguments for and against human enhancement, explore the inevitability of life extension, and consider possible solutions to the growing issues of social and ethical implications and concerns. Edited by the international
