The Blame Game: Whose responsibility is habitat loss?; Appendices; A. Utah Sensitive Species List; B. Utah Wildlife Species Checklist; C. Utah Wildlife Viewing Locations D. Intermountain Wildlife Refuges About the author; About the contributing artists; Index

Sommario/riassunto

From flying squirrels on high wooded plateaus to hanging gardens in redrock canyons, the Intermountain West is home to some of the world's rarest and most fascinating animals and plants. Creatures of Habitat details many unique but little-known talents of this region's strange and wonderful wild inhabitants and describes their connections with native environments. For example, readers will learn about the pronghorn antelope's supercharged cardiovascular system, a brine shrimp-powered shorebird that each year flies nonstop from the Great Salt Lake to Central Argentina, and a rare
