

1. Record Nr.	UNINA9910213842603321
Titolo	2017 Network Traffic Measurement and Analysis Conference (TMA) // Institute of Electrical and Electronics Engineers Staff
Pubbl/distr/stampa	Piscataway, New Jersey : , : IEEE, , 2017
ISBN	3-901882-95-2
Descrizione fisica	1 online resource
Disciplina	621.382
Soggetti	Telecommunication - Computer programs Telecommunication - Data processing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The Network Traffic Measurement and Analysis Conference (TMA) is a highly selective venue for the presentation of both early stage and mature research as well as controversial works on all the aspects of network measurements The focus is on improving the practice or application of measurements, across the entire network stack up to the application layer, with an emphasis on new areas of network communication such as Software Defined Networks, Cloud services, Content Distribution Networks, Social Networks, mobile applications and data centers We also welcome more traditional measurement topics, such as traffic classification, anomaly detection, network performance evaluation and traffic analysis.
