Nota di contenuto	Introduction / Daniela Merolla -- ; 1. The Mara cultural heritage digital library : the implications of the digital return of oral tradition / Jan Bender Shetler -- ; 2. Technauriture as a platform to create an inclusive environment for the sharing of research / Russell H. Kaschula -- ; 3. From restitution to redistribution of ewe heritage : challenges and prospects / Kofi Dorvlo -- ; 4. YouTube in academic teaching : a multimedia documentation of Siramori Diabate's Song "Nanyuman" / Brahim Camara, Graeme Counsel and Jan Jansen -- ; 5. New electronic resources for texts in Manding languages / Valentin Vydrin -- ; 6. Questioning "restitution" : oral literature in Madagascar / Brigitte Rasoloniaina and Andriamanivohasina Rakotomalala -- Afterword : Sharing located / Mark Turin.
Sommario/riassunto	In a world where new technologies are being developed at a dizzying pace, how can we best approach oral genres that represent heritage? Taking an innovative and interdisciplinary approach, this volume explores the idea of sharing as a model to construct and disseminate the knowledge of literary heritage with the people who are represented by and in it. Expert contributors interweave sociological analysis with

an appraisal of the transformative impact of technology on literary and cultural production. Does technology restrict, constraining the experience of an oral performance, or does it afford new openings for different aesthetic experiences? Topics explored include the Mara Cultural Heritage Digital Library, the preservation of Ewe heritage material, new eresources for texts in Manding languages, and the possibilities of technauriture. This timely and necessary collection also examines to what extent digital documents can be and have been institutionalised in archives and museums, how digital heritage can remain free from co-option by hegemonic groups, and the roles that exist for community voices. A valuable contribution to a fast-developing field, this book is required reading for scholars and students in the fields of heritage, anthropology, linguistics, history and the emerging disciplines of multi-media documentation and analysis, as well as those working in the field of literature, folklore, and African studies. It is also important reading for museum and archive curators.

Unintended Consequences: Targets, Third Parties, and Informers -- 8. Unintended Consequences: Police -- 9. Controlling Undercover Operations -- 10. The New Surveillance -- Notes -- Index

Sommario/riassunto

Providing a rich picture of past and present undercover work, and drawing on unpublished documents and interviews with the FBI and local police, this penetrating study examines the variety of undercover operations and the ethical issues and empirical assumptions raised when the state officially sanctions deception and trickery and allows its agents to participate in crime.

Sommario/riassunto

In response to the recent financial crisis, many countries have initiated monetary stimulus packages. Maintaining proper measures of monetary aggregates is of particular importance for such economic policies. However, many central banks worldwide use the simple-sum monetary indexes, which ignore the liquidity characteristics of financial assets.

Using the simple-sum indexes can produce misleading information, especially for broad monetary aggregates within which financial assets are not likely to be perfect substitutes. - - This book focuses on alternative economic stability indicators, and outlines the methods for constructing proper monetary and financial indicators known as Divisia indexes. The Divisia monetary indexes are designed to measure accurately the liquidity in the economy by assigning different weights to different financial assets according to their usefulness in transactions. This book is highly relevant to economists interested in monetary policy and the construction of core inflation indicators and proper monetary indexes, in accordance with aggregation and index number theory. This book is the first to publish Divisia-based money supply indexes and core inflation indicators for the Gulf Cooperation Council (GCC) countries and for the Gulf Monetary Union. Researchers who use the financial data published by GCC central banks can use our indexes and findings to examine the interactions among the relevant macro-economic variables. - -
